Double Press Fittings

| Lesser the Construction Time, Higher the Possibilities

| Supreme Solution for Industrial, Residential and Commercial Plumbing Application

March 2021

Press Fittings for Plumbing Ease

In the plumbing industry, the success of a project majorly depends on a secured connection.

Contractors or Professional Plumbers used or are still using Traditional Methods like welding, brazing and soldering for they are competent with it. However, TRADITIONAL METHODS were a prominent way for connecting pipes or piping installation until, in recent years, the PRESS FITTINGS technique evolved for a secure and quick plumbing connection.

Press Fittings for Water-Tight Seal

A technique to physically press a connection onto the pipe for an impermeable seal is Press Fittings in Plumbing. Mainly used for Commercial, Industrial or Residential purpose this technique is followed by a Press tool that ensures a pipe connection by inserting the pipe into the pipe fittings and pressing the connection.

These pipe fittings are known as Press Fittings. They come in all types of metal, carbon steel, stainless steel, copper, bronze, plastic, etc.

Rhinox Deals in Stainless Steel Double [V] Press Fittings

Rhinox the leading manufacturer and supplier of Stainless Steel Plumbing Pipes, Tubes and Fittings headquartered in USA acknowledged and accepted the use of Stainless Steel for plumbing requirements and became the world's leading supplier in the industry.

Rhinox Stainless Steel Plumbing

- Durable
- Reliable
- Hygienic
- Improved Water Delivery
- Leak-free connection
- Low Maintenance

We are surrounded by Stainless Steel everywhere since years. It gives aesthetic appearance to a house with durability, longevity and low maintenance.

Rhinox Stainless Steel Plumbing offers high-quality Stainless Steel Pipes, Tubes and Fittings with supporting sustainable, smart and safe methods of plumbing. Rhinox use heavy grade Stainless Steel 316L which is an austenitic steel - a corrosion resistant steel with the minimum carbon content essential for the improved water quality. Our values lie in Customer Fulfillment, Secure Plumbing Connection, Longevity and Efficiency. Also, Rhinox uses 100% Stainless Steel which is recyclable to reduce the Environmental Degradation.

To grow a professional contracting business many plumbers, builders or commercial and mechanical contractors are paying heed to Press Fittings as an excellent solution for a variety of benefits it offers.

Rhinox Double [V] Press Fittings

Maximum Quality + Minimum Effort = Rapid Installation

100% Stainless Steel

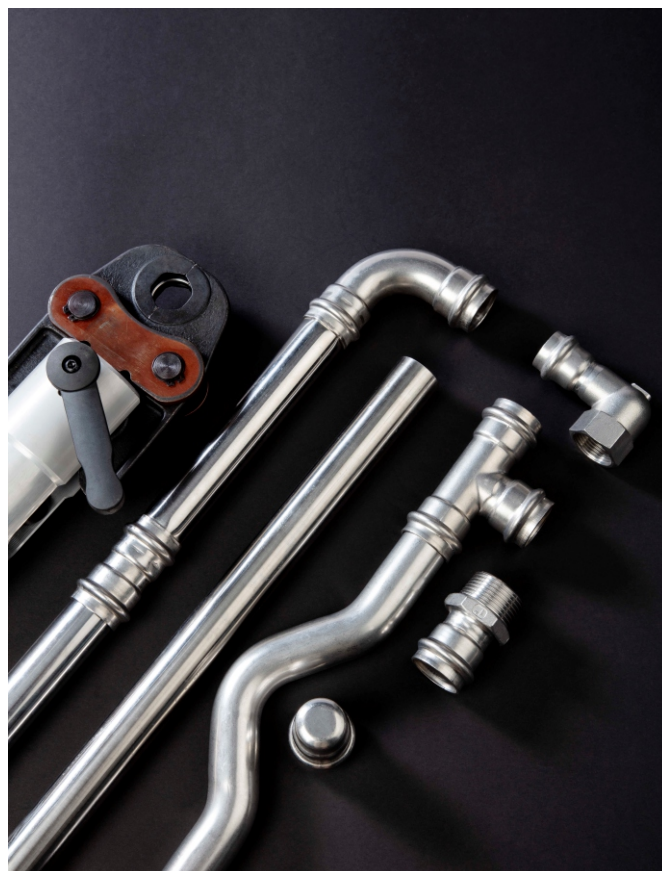

V Press Fittings by Rhinox are manufactured with heavy grade Stainless Steel as this metal is not only prone to temperature and corrosion but also provides a hygienic connection. Double Press Fittings from Rhinox is 100% Stainless Steel competent altogether to compress and withstand the press fittings having the life expectancy of about 50 years.

Save Time

Comparing Traditional methods of Plumbing and Double Press Fittings. Traditional methods take double the time to finish a plumbing connection. Despite with Double Press Fittings you get rid of sharp edges as cutting the pipe can be done with the tool. This technique is much quicker than it sounds. Once you cut the pipe you run it through press connections, set up the pipe and fittings together, get the tool out, press it and you are done. Rhinox Double Press Fittings asks for 5 seconds for small diameters and up to 40 seconds for bigger diameters, consistently cutting installation time.

Quality at its Heart

Rhinox believes in high-quality products, sustainable and safe methods of plumbing to reduce environmental degradation and maintain the productivity.

Secure Connections

Stainless Steel for sanitary and plumbing sector is trusted for years. Yet when combined with Double Press Fittings it delivers secure connections as jointing is carried out with no glues, resins or fire flames. Pressing the plumbing connection gives utmost security. Moreover, once pressed a quality check is done to assure leak free plumbing connection.

Jobsite Safety

Irrespective of Plumbing method, labor safety is most important. Therefore, when it comes to big commercial size projects you should literally look at saving the labor. Labor wise Press fittings are a lot safer.

Dynamic

316L Inox Double Press Fittings offers a variety of applications. It is good for a portable water system hot and cold, Gas, Heating, Cooling, Solar, Fire Protection Systems, Gas, Compressed Air Systems, Fire Sprinkler Systems etc. For its variety of applications Rhinox Press Fittings are dynamic to any of the mentioned plumbing application.
